

Top Reasons to Buy Matrox MXO2 LE – Not Blackmagic DeckLink HD Extreme

- 1. Matrox MXO2 LE works with Mac Pros and MacBook Pros** – DeckLink HD Extreme works only with towers.
- 2. Matrox MXO2 LE fits in a single PCIe slot** – DeckLink HD Extreme occupies one slot plus an additional bracket for the HDMI option.
- 3. Matrox MXO2 LE is a professional breakout box** – DeckLink HD Extreme does not have a breakout box option.
- 4. Matrox MXO2 LE provides 10-bit HDMI monitoring with a unique color calibration tool that turns your HDMI screen into a professional-grade video monitor** – DeckLink HD Extreme does not offer a calibration utility.
- 5. Matrox MXO2 LE provides 10-bit realtime hardware upscaling, downscaling, and cross conversion on input and output** – DeckLink HD Extreme depends on your CPU for some scaling operations.
- 6. Matrox MXO2 LE provides analog component, Y/C, and composite output simultaneously via separate, dedicated connectors** – DeckLink HD Extreme has only three connectors used for a component output or Y/C and composite output.
- 7. Matrox MXO2 LE supports eight channels of HDMI embedded audio** – DeckLink HD Extreme supports only two channels.
- 8. A version of Matrox MXO2 LE is available with Matrox MAX technology for faster than realtime H.264 encoding for Blu-ray, the web, and mobile devices** – DeckLink HD Extreme does not offer this important benefit.
